## **FOUR REASONS**

Here are four reasons why you should send your restoration work to **Demar Dental Labs**:

- 1 Our work, our fit and your satisfaction are unconditionally guaranteed.
- 2 We make it simple. We get it right the first time so you end up with more valuable chair time.
- 3 We have been delivering the finest quality restorations to the most exacting dental professionals for more than 25 years.
- 4 You will always receive outstanding restorations at industry competitive pricing.

## **WHO IS DEMAR DENTAL LABS?**

We are a state-of-the-art, full service crown, bridge and implant laboratory. With a full spectrum of products and services that are available to the dental professional. From single unit porcelain-fused-to metal (PFM) crowns to complex implant and all ceramic porcelain or zirconia full mouth restorations, we are fully staffed and equipped to handle your most demanding work. For more information visit our website at [www.demardental.com](http://www.demardental.com).

## **CUSTOMER SERVICE**

We have trained customer service managers that do nothing but manage and communicate every aspect of your cases with you. From your initial call for a pick-up to your receipt of a final product, we are there for you. You will get straight answers and quality restorations that are on time, every time.

## PORCELAIN FUSED-TO-METAL

We produce the finest quality PFM crowns, bridges and implants in the industry. The majority of our dentists do semi-precious, noble and high noble restorations. We are seeing greater demand for higher quality restorations and in particular noble bio's and Captek restorations. Over the past few years some dentists tried "low cost" or "off-shore" options but have reported that they were experiencing uneven quality and unreliable turnaround times. Our clients receive higher quality, more predictable and stable restorations.

## IMPLANTS

We take great pride in our ability to assist your office with the planning and implementation of even the most complex implant case. We work hand in hand with the leaders in the implant industry... Zimmer, 3i, Strauman and Nobel Biocare, are all premier partners of Demar Dental Labs.

## 3M LAVA ZIRCONIA

Every day more dentists ask Demar Dental Labs for Lava Crowns and Bridges from 3M ESPE. Lava restorations are made with Lava Zirconia and are designed and milled with the innovative Lava CAD/ CAM system. The combination of materials and precision milling produces a strong restoration with excellent esthetics and marginal fit. Lava restorations come with a "Genuine Lava" Certificate so you will know you are receiving a true Lava product.

## NOBEL BIOCARE PROCERA

The Nobel Biocare Procera is a system developed for manufacturing of individualized dental restorations. Utilizing the latest technologies, a perfectly precise fit is ensured. By combining the Procera manufacturing technology with the use of alumina and zirconia ceramics, both of which are biocompatible materials with good mechanical properties, Demar Dental Labs provides individualized, highly esthetic dental solutions.
